

Allowing Sinclair to use public airways for political gain is an absolute threat to Democracy. I'm ashamed of the FCC for not upholding your core reason for existence and your obvious partisan position. Corporate control of the airways is a textbook example of fascism, what's next??? You only bring more heat to the entire issue and you'll find yourself without jobs once the Republican neo-cons get thrown out on their butts. Do yourselves a favor and uphold your purpose, do Democracy a favor and demand fair and balanced programming. If you don't you'll just be another reason we'll all work hard to change course in this country.

Mike Shelton
